Reverse Raised Panel Doors

Combines the sleek, clean lines of the flat panel with a 3/8" solid raised panel on the back side of the door.

Some doors are not offered in all species or finishes. Please visit with your dealer for more information.

Built for A Lifetime

Koch Cabinets has been producing cabinetry in the Midwest since 1989.

We believe in the quality craftsmanship that is produced in America and we stand behind our work. Our limited lifetime warranty, on our Classic and Imperial cabinetry and finishes, is our commitment to you that your cabinets are built to last.

Flat Panel Doors

The 1/4" flat panel door creates a sleek, clean, design. This door style can offer you the traditional or contemporary style you are looking for.

DOOR AND DRAWER OVERLAY OPTIONS

Modified Full Overlay

The term "overlay" refers to the amount the cabinet door (and drawer front) overlays (or hangs over) the cabinet frame opening. Koch frames are typically 1 3/4" wide and two overlay options are available. Our standard overlay generally covers 1/2" of the frame, leaving 1 1/4" of the frame exposed. The Mod-Full overlay option will generally cover 1 1/2" of the frame, leaving 1/4" of the frame exposed.

Note: There can be some exceptions with certain cabinets. Check with your dealer for more information.

Glaze Options

Rustic Woods

Doors made with rustic woods may have knots, mineral marks, blemishes, and character spots. The amount of characteristics are random so no two doors will be exactly the same, making it a unique and beautiful product. There is no minimum or maximum amount of characteristics in a door.

Wormholes Knots Mineral Streaks

Distressing

Finish Techniques

DISTRESSING:
Our distressing technique creates a unique look with cracks, dents, nicks, and wormholes, giving the appearance of aged wood.

RUB THROUGH:
Allows the natural wood color to show through the finish or paint.
